Note: forwarded message attached.

Dear Lance:

You certainly have my permission to quote from my old guidebook on the Northern Colorado Plateau, and use it otherwise, as well, if you cite the book. Best wishes.

Keith

Dr Rigby

My name is Lance Weaver. I am a student in the geology program at BYU. I have nearly finished my bachelors degree, and am currently working in St George, preparing to apply for graduate school at BYU or the U.

The reason I am writing is that I am building a website/database in order to help people learn the geology of Utah. A rough draft of the site is running off my server at <http://www.utahgeology.com>. One of the sections is a geologic roadguide to utah, and I was wondering if I could use much of your book "Field Guide: Northern Colorado Plateau" for this section (properly & conspicuously cited, of course). I have contacted the publisher, and they informed me that since the book is long out of print, the decision is solely yours.

This website is somewhat of a lifelong dream for me, and I hope it will one day be the ultimate souce for geologic data on the Colorado Plateau. Any help you could give would be greatly appreciated.

sincerely, Lance Weaver

I was just wondering who I need to talk to about the copyright regarding a 30 year old geology guide you published. It has long been out of print.

I received permission from the author before he died, to publish portions of the book online. I just want to make sure that he owned the copyright and not the publisher? Also, now that the author has passed away, what happens to the copyright permissions?

Good Morning,

All of our older agreements, like this one had an out of print clause and part of the clause stated: All publication rights to the Work shall revert to the Author at such time as the Publisher declares the Work Out of Print, so any rights we would have had would have been returned to the author.
